[Portafolio](#)

## \* ABOUT ME

Full-Stack Developer with experience in building web applications using Python and JavaScript. I have worked on developing complete solutions, from backend logic to frontend interfaces, integrating external services and ensuring clean architecture and code quality. I adapt easily to new environments and enjoy working on practical, maintainable, and well-structured solutions.

## Precisa Group SRL

Full-Stack Developer | July 2025 – Present

Member of the development team, primarily focused on frontend development while also contributing to backend tasks:

- Development and maintenance of scalable APIs and endpoints aligned with REST standards and clean architecture principles.
- Frontend development with Next.js, building reactive, optimized, and performance-focused interfaces.
- Development of automated web scraping modules.
- Participation in technical decision-making and continuous system improvement.

## \* SKILLS

- |              |               |
|--------------|---------------|
| • Python     | • TailwindCSS |
| • JavaScript | • Flask       |
| • HTML5      | • Nodejs      |
| • CSS3       | • FastApi     |
| • SQL        | • NextJs      |
| • Django     |               |
| • React      |               |

## Internship – Dirección General de Aduanas

Full-Stack Developer | September 2023 – November 2023

Responsible for developing fully functional applications, creating dynamic user interfaces, and building REST APIs using technologies such as Python and JavaScript, along with libraries and frameworks including TailwindCSS, React, and Django.
